CREATED BY YOUR IMAGINATION.
CRAFTED BY TNR VIEWS.

uPVC windows and doors
A DIFFERENT VIEW OF LIFE

Home or office, you desire everything to be designed according to your dream plan – down to the last detail. Unfortunately though, up till now, there wasn’t much that could be done when it came to doors and windows. But now, all that’s going to change, thanks to TNR Views!

TNR Views brings your ideas to life, by helping you find that perfect window or door, and in turn, add that much-needed personalised touch. Whatever the dream shape of your building, rest assured our range of products will complement it. After all, a great view deserves the best.

TNR Views. See life in a different view.

THE SHAPE OF THINGS TO COME

Tired of seeing the same old boring windows and doors? If yes, then TNR Views is for you! Our products are made using uPVC, unlike conventional windows and doors that use aluminum and wood. In other words – it’s perfect for those yearning unique, eco-friendly, and customisable designs with unmatched durability.

With TNR Views, the possibilities are as vast as your imagination!
LOOKS GOOD. WORKS GREAT!

TNR Views-made windows and doors don’t just stop at looking great. They have a lot more benefits that make them the perfect choice for your home or office.

**Designed to be different**

The window is the heart of a building. Make yours one that everyone falls in love with! Our architecturally-superior uPVC windows and doors come in a wide range of shapes, sizes and designs, which meet all the objective principles of graphic designing that make them impeccable by nature:

- Symmetry and balance
- Unity and emphasis of lines
- Form and area

**A life full of colour**

Our products come in a wide variety of colours, patterns, and finishes, ensuring that whatever the colour of the room, you’ll find something that goes great with it. So go ahead, start playing matchmaker!

**Summers just got a lot cooler!**

While our uPVC windows and doors are made in accordance with the highest technological standards, their inherent properties offer superior insulation values. Our uPVC profiles utilise a state-of-the-art multi-chambers technology, which prevents the outflow of cold air through windows. Hence, unlike aluminum and wood, they help in complete cooling when an air conditioner is running. In addition, they also provide better heat insulation that further ensures good cooling. In a nutshell – cool air-conditioned air remains inside during the summers, while warm air is trapped during the winters.

**The advantages of optimal insulation:**

- Natural living comfort
- Optimum energy utilisation
Quality that you can see

In line with international standards, profiles supplied by VEKA undergo a strict quality test. The profiles are subject to continuous internal and external controls. Only after undergoing this stringent quality measure do the profiles get a seal of approval by TNR Views. Our products are tested and certified for:

- Rain proofing: Our products are sealed against beating rain and the intrusion of water. The profiles can be installed in up to 100m high buildings.
- Wind resistance: It’s the measurement of air that can go through (in a defined timeline) the sash and frame, at different air pressures. Our windows are approved for installation heights of 8m, 20m and 100m.
- Corner weld strength: This is the measurement for the stability of frame construction. The profiles utilise multi-chamber technology, and are built for high forces/weights.
- Our uPVC profiles, supplied by the world leader – VEKA, are the perfect choice for nature lovers; being completely environmentally friendly.

Safe and no sound

We understand that safety and security are your primary concerns. That’s why we have formulated construction guidelines to design our high quality windows and doors to protect against burglaries and fires. Our uPVC products have steel reinforcement in sash and frame that maintain high security standards. For increased security, our products can be ordered with special fittings, security glass with foil in the middle, and additional locking devices.

Another important advantage of our products is sound, or rather, the lack of it. Because, whether it’s quality family time or an office meeting, nobody likes unwanted noise ruin important moments. The reason why, our products’ uPVC profiles have innately good sound isolation properties. Coupled with a special glass, they serve as highly effective noise insulators.

High durability. Low maintenance.

uPVC is inherently a low maintenance material, and TNR Views’ expertise ensures stability of profiles, expert fabrication, and accurate installation. Together, you get windows and doors that last a lifetime, with perfect functionality and practically zero maintenance costs. Their weatherproof nature and attractive designs & colors eliminate the need for painting, adding to their low maintenance. TNR Views’ uPVC products have ultimate durability, as they have flush surfaces that are hygienic and easy to clean.
WIDE RANGE.
LOTS MORE POSSIBILITIES.

SO WHO CAN USE TNR VIEWS?

In short, practically everybody! Our windows and doors are suitable for use in residential developments, commercial buildings, corporate houses, schools, factories, showrooms and hotels. They provide a great alternative to conventional casement systems. The compliance of products from TNR Views to various performance-specific criteria make them an ideal first choice in the current construction market.

FEATURES AT A GLANCE

- Multiple chamber system design enhances heat and sound insulation properties
- Our windows are capable of accommodating glass of varied thickness, through the use of different-sized glazing beads, provided by VEKA
- Profile section and thickness are designed to minimise fabrication wastage and reduce window cost
- Galvanised steel reinforcement gives optimum stability to the system
- The main profile wall thickness is fully-compliant with the technical specifications set forth in European standard EN12608
- Color foil lamination processes can be applied to the profile systems to satisfy the aesthetical needs for color-coordinated windows
TNR Views is committed to provide world-class uPVC windows & doors to its customers, which are not just safe, but also great performing. Our entire range of products uses VEKA profiles that are infused with a special Tropical Mix in their profiles to suit the Indian climate. Apart from this, all our products are also lead-free and comply with worldwide norms such as the AAMA (American Norms), EN (European Norms), BS (British Standards), DIN (German Norms), and LEED (Leadership in Energy Efficiency and Design). When you buy a product from TNR Views, you can be assured that they meet the highest of SHGC standards specified by the IGBC (Indian Green Building Council).

- We have tied-up with the leading world-class glass manufacturer, Saint-Gobain, to give you windows and doors with high performance and longevity
- We have also tied-up with Pulse and Roto, the leading hardware manufacturers, for better and longer performing windows and doors
- We are known as the name that’s redefining quality & service, when it comes to uPVC windows & doors
ABOUT THE TNR GROUP

The TNR Group is currently the fastest growing infrastructure conglomerate, with a presence in Hyderabad and Bangalore. It was established in the year 1999 with a primary focus on quality and delivery through professional execution.

Through sheer hard work and commitment that continues to inspire its dedicated employees, competent engineers, and experienced workforce, and a single-minded focus of building quality homes consistently for its discerning clientele, the TNR Group has become a sought after name in the Hyderabad real estate market.

Globally-aware clients sought more as development in the IT sector, and the economic liberalisation, turned South India into a corporate destination. Customers started looking for quality, greenery spaces, modern designs, and amenities in their addresses. This led to the TNR venturing into the construction field, to provide clients constructions with distinct personalities and of the highest standards.

Having witnessed immense success in the field of construction, TNR evolved its business to become the TNR Group, with the prospective business verticals of Construction, Housing, Ready Mix Concrete, and uPVC windows and doors made with state-of-the-art German technology.

The TNR Group’s success story began by focusing on consistent performance, providing superior quality services, and delivering on time to its customers. To know more, get in touch with us by calling us on (040) 24037442, or mailing us at info@tnrindustries.co.in
